SUMMARY AND OBJECTIVE

Computer Engineering student at UFRB focused on Java backend development. Experience building REST APIs with Spring Boot, JPA and MySQL, as well as projects involving automation and microservices architecture. I am looking for an opportunity to apply good practices, grow technically and contribute to efficient, well-structured solutions.

EDUCATION

COMPUTER ENGINEERING (2022 - present)

FEDERAL UNIVERSITY OF RECONCAVO DA BAHIA - UFRB

Expected graduation: 2028

PROFESSIONAL EXPERIENCE

Network Technical Support - Conect Telecom (2019 - 2022)

- Monitoring and diagnosis of network infrastructure failures
- Configuration of switches, routers and firewalls
- Technical support and troubleshooting of connectivity issues
- User support and service stability maintenance

Instructor - Introduction to Arduino and Embedded Projects - UFRB (2024)

- Teaching fundamentals of electronics and embedded systems.
- Discussion of safety and precautions in electronics laboratories.

RAS-IEEE Chapter Board - UFRB (2024-2025)

- Vice-president of the RAS-IEEE UFRB Student Chapter, organizing activities, projects and technical events in robotics and automation for the academic community.

Researcher - PIPETA Autonomous Irrigation Project - UFRB (2024 - 2025)

- CNPq undergraduate research focused on the development of an autonomous robot for irrigation and soil-moisture monitoring.
- Preparation of abstracts and presentation of the project at Reconcitec UFRB.

ENZO GABRIEL DE JESUS SALERMO

TECHNOLOGIES

Languages: Java, JavaScript, TypeScript, Python

Backend: Spring Boot, JPA, JDBC, REST APIs

Databases: MySQL, MongoDB

Tools: Git, GitHub, Maven, Postman

Frontend: HTML, CSS

Desktop: JavaFX

COURSES

- Complete Java - Object-Oriented Programming | Udemy (2025)
- Extreme English | Udemy (2026)
- Robotics and Automation Workshop | UFRB (2024)
- Everyday Interactions in English | UFRB (2024)

PROFESSIONAL / PERSONAL PROJECTS

Mini E-commerce (Java | Spring Boot | MySQL)

- REST API with layered architecture (Controller, Service, Repository)
- Object-relational mapping with JPA/Hibernate
- Modeling users, orders, products and payments
- Endpoint testing with Postman

JDBC Project (Java | MySQL)

- Relational database integration using plain JDBC
- Manual implementation of the DAO pattern
- SQL for CRUD operations

Lire - Personal Reading Tracker (Java)

- Java application for reading tracking
- Object-Oriented Programming
- Basic layered architecture

Financial System Project (Java)

- Simulation of financial operations using OOP concepts

Hotel Salerno (Python)

- Basic hotel-management system using OOP concepts

LANGUAGES

- English: Intermediate
- Spanish: Basic
