

ENZO GABRIEL DE JESUS SALERMO

Computer Engineering Student | Java Backend Developer

LinkedIn: [/in/gbsalermo](#) | +55 75 99978-0174

E-mail: salermojgabriel@gmail.com | GitHub: [@gbsalermo](#)

SUMMARY AND OBJECTIVE

Computer Engineering student at UFRB and Java/Spring Boot development intern at Embrapa, focused on backend development, REST APIs and business rules. Hands-on experience with JPA/Hibernate, PostgreSQL/MySQL, OpenAPI/Swagger documentation, testing and database versioning with Flyway. Additional background in robotics, automation and embedded systems. I aim to grow as a Java backend developer and contribute to reliable, well-structured solutions for real-world problems.

EDUCATION

B.S. IN COMPUTER ENGINEERING (2022 - present)

FEDERAL UNIVERSITY OF RECONCAVO DA BAHIA - UFRB

Expected graduation: 2028

PROFESSIONAL EXPERIENCE

Java/Spring Boot Development Intern - Embrapa (2026 - present)

- Maintenance and evolution of Java/Spring Boot backend services and REST APIs.
- PostgreSQL integration through JPA/Hibernate, validation and resolution of real system demands.
- Exposure to Vue.js frontend and use of Git/GitHub, Maven and Postman in the development workflow.

Network Technical Support - Conect Telecom (2019 - 2022)

- Monitoring and diagnosis of network infrastructure failures; configuration of switches, routers and firewalls.
- Technical assistance, connectivity troubleshooting and user support.

Instructor - Introduction to Arduino and Embedded Projects - UFRB (2024)

- Taught electronics fundamentals, embedded systems and laboratory safety practices.

RAS-IEEE Student Chapter Board - UFRB (2024 - 2025)

- Vice President of the RAS-IEEE UFRB Student Chapter, organizing robotics and automation activities, projects and technical events.

Researcher - PIPETA Autonomous Irrigation Project - UFRB / CNPq (2024 - 2025)

- Undergraduate research focused on an autonomous solution for irrigation and soil-moisture monitoring.
 - Technical documentation, abstract writing and project presentation at Reconcitec UFRB.
-

TECHNOLOGIES

Languages: Java, Python, JavaScript, TypeScript

Backend: Spring Boot, JPA/Hibernate, JDBC, REST APIs, OpenAPI/Swagger

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, Maven, Postman, Flyway, GitHub Actions

Frontend: HTML, CSS, React, Vue.js

COURSES

- Complete Java - Object-Oriented Programming | Udemy (2025)
 - Inglês Extremo - English Course | Udemy (2026)
 - Robotics and Automation Workshop | UFRB (2024)
 - Everyday Interactions in English | UFRB (2024)
-

PROFESSIONAL / PERSONAL PROJECTS

SGL - Laboratory Management System (Java | Spring Boot | PostgreSQL)

- Corporate REST API for supplies, batches, requests and inventory traceability.
- FEFO/FIFO rules, movement auditing, Flyway migrations and OpenAPI/Swagger documentation.
- Automated tests with JUnit/Mockito and layered architecture.

RASCOMP - Robotics Competition Management (Java 21 | Spring Boot | MySQL)

- API for registrations, categories and operation of Sumo and Line Follower competitions.
- Inspection, ranking, bracket, round and automatic-result workflows with separated domain rules.
- Backend validated with manual/automated tests, Flyway and GitHub Actions.

BUSIVS (Python | Telegram | Cloudflare)

- Collaborative bot for checking UFRB shuttle location and schedules.
- Route and operational-window modeling, webhook integration and persistent state with low operating cost.

PIPETA - Autonomous Irrigation (ESP32/ESP8266 | Arduino | IoT)

- Academic automation project using moisture sensors, microcontrollers and irrigation actuation.
 - Software, electronics and physical-system integration through prototyping and applied research.
-
